#### SWEDEN.

#### LIST OF ARTICLES THE EXPORT OF WHICH IS PROHIBITED.

*June 1, 1915.*

#### NOTES.

1. As a general rule, goods in transit through Sweden will not be detained or interfered with (even if their exportation from Sweden is prohibited) provided that they are accompanied by a bill of lading clearly indicating the ultimate (non-Swedish) destination.

(17641)

As an exception to this rule, however, the transit through Sweden of arms, ammunition, and other war material is prohibited. The articles to which this prohibition of transit applies are indicated by a cross (X) in the list printed below.

2. The numbers and letters quoted below relate to the headings of the "Statistical Index of Goods" under which the prohibited articles fall.

The numbers are the same as those of the Swedish Customs Tariff\*; the letters indicate the sub-divisions of the numbers, and are found only in the "Statistical Index"—which is considerably more detailed in classification than the Customs Tariff.

## DENMARK.

## LIST OF ARTICLES THE EXPORTATION OF WHICH IS PROHIBITED.

June 3, 1915.

## NOTES.

1. As regards goods in transit and transshipment goods (in the Copenhagen free port and all other Danish harbours), all such goods, if of a kind prohibited to be exported from Denmark, are covered by the prohibition unless they are on a thorough bill of lading to a port in a foreign (non-Danish) country.

The prohibition is therefore applicable in cases where the goods are either shipped to a Danish port "to order," or where the goods are redestined to another port than the one originally mentioned in the bill of lading (unless it is only a question of redestination to another port in the same country).

(20928).
